

20 advanced driving assistance systems

All new Renault Kangoo Van comes with twenty optional advanced innovative driving assistance systems. Tried and trusted, it promises a safe and secure driving experience.

rear view assist. Via a digital screen – instead of the interior rear-view mirror – you can view what the camera installed at the rear of your vehicle sees.

rear-view camera. It provides a rearward view on the easy link screen or the interior rear-view mirror when you engage reverse gear. Superimposed outlines make your manoeuvres easier and safer.

hill start assist. Combined with ESC, hill start assist maintains brake pressure automatically for 2 seconds to give you time to lift your foot from the brake pedal and press the accelerator. The system activates when the slope exceeds 3%. Available as standard on all models.

wide view mirror. Located in the passenger sun visor, it improves your vision and helps to minimise the effect of blind spots at Y-junctions. Available as standard on Advance models.

Grip Xtend. It allows you to drive in all weathers on different types of terrain (mud, leaves, rough roads, etc.). The system combines electronic stability control (ESC) and all-weather tyres to bring you enhanced traction, available at speeds of up to 30mph.

"zoning" function For locking or unlocking either the front doors or the loading area.

*All equipment is optional
